## School Curriculum

The curriculum incorporates NEP 2020 in its educational approach and the most effective pedagogical practices. It represents a process of revision that is both evolutionary and developmental. It is designed to cater for the needs of children in the modern world. The curriculum acknowledges that children live in and are a part of society and that their personal development is deeply affected by their relationships at home and with other people in the society. The curriculum takes full account of these aspects of the child's life in seeking to balance individual and social development, in developing an appreciation of how the different dimensions of life complement each other, and in helping the child to work co-operatively with others.

An important goal of the curriculum is to enable children to learn how to learn, and to develop an appreciation of the value and practice of lifelong learning. The curriculum aims to instil love for learning that will remain with the child through all stages of formal education and that will express itself in an enquiring mind and a heightened curiosity.

## Assessment Pattern

Assessment is central to the process of teaching and learning. It is used to monitor learning processes and to ascertain achievement in each area of the curriculum. Through assessment the teacher constructs a comprehensive picture of the short-term and long-term learning needs of the child and plans future work accordingly. Assessment is also used to identify children with specific learning difficulties so that the nature of the support and assistance they need can be ascertained and appropriate strategies and programmes put in place to enable them to cope with the particular difficulties they are encountering.

Assessment assists communication about children's progress and development between teacher and child, between teacher and parent, and between teacher and teacher. It helps the child to become more self-aware as a learner and to develop powers of self-assessment. It also helps to ensure quality in education.

## HOMEWORK POLICY

Homework is set for all students and they are given the necessary time to complete it during the prep hours. 40 minutes to 1.5 hrs of guided self-study each day gives them the confidence to work and strengthen their skills.

- homework is an integral part of the curriculum and is necessary in order to cover the syllabus and reinforce the learning at home
- it is an extension of class work
- is appropriate to the age, ability and developmental stage of the individual student
- is done on the day allocated in the homework timetable for a particular subject

Homework may take a range of forms including:

- the completion of class work or preparation for an assessment
- reading and writing
- research and project work
- mathematical problems
- memorising

Depending on the Grade level of the student, the time expected to be spent on homework may vary. The children will be given work that will take 40 minutes to 1.5 hrs daily to enhance their concepts and skills.
