# Aims And Objectives

The curriculum developed for UKG aims at helping the child unfold his/her talents, to facilitate and guide the child to sharpen his/her mental and physical abilities. It helps to enhance the listening, reading, speaking & writing skills of the child.

The programme is based on the child-centered approach wherein through play-way the basic concepts are taught. The main emphasis is placed on the child's experiences and interaction.

A typical day in UKG starts with recapitulation of the concept followed by guided / free general conversation session during which the children will get an opportunity to share their experiences at home and outside the school.

Circle time will be conducted on understanding to various topics related to world around the child.

At the end of each day, 15 minutes will be devoted to rhyme and storytelling sessions or a general conversation based on the topic discussed will happen. The general conversation also includes moral values/life-skills, vocabulary building and other relevant topics.

All the festivals will be discussed with the children as and when they are celebrated. How and why, they are celebrated will be discussed along with their significance.

The UKG syllabi thus aim at an all-round personality development to guide the child to develop himself / herself as global citizens.

## HOMWORK POLICY

Homework is set weekly for all students and they are given the necessary time to complete it during the prep hours. 40 minutes of guided practice gives them the confidence to work and strengthen their skills.

- homework is an integral part of the curriculum and is necessary in order to reinforce the learning at home
- it is an extension of class work
- is appropriate to the age, ability and developmental stage of the individual student
- is done on the day allocated as per the schedule for a particular subject

Homework may take a range of forms including:

- the completion of class work or preparation for an assessment (practice work)
- oral reinforcement
- activity- based
- mental math

The children may be given oral work / practice work that will take 40 minutes daily to enhance their concepts and skills.
